

CAPSTONE PROJECT SHOP FOR HOME

Group Number - 11

Presentation on

JKJS Stores

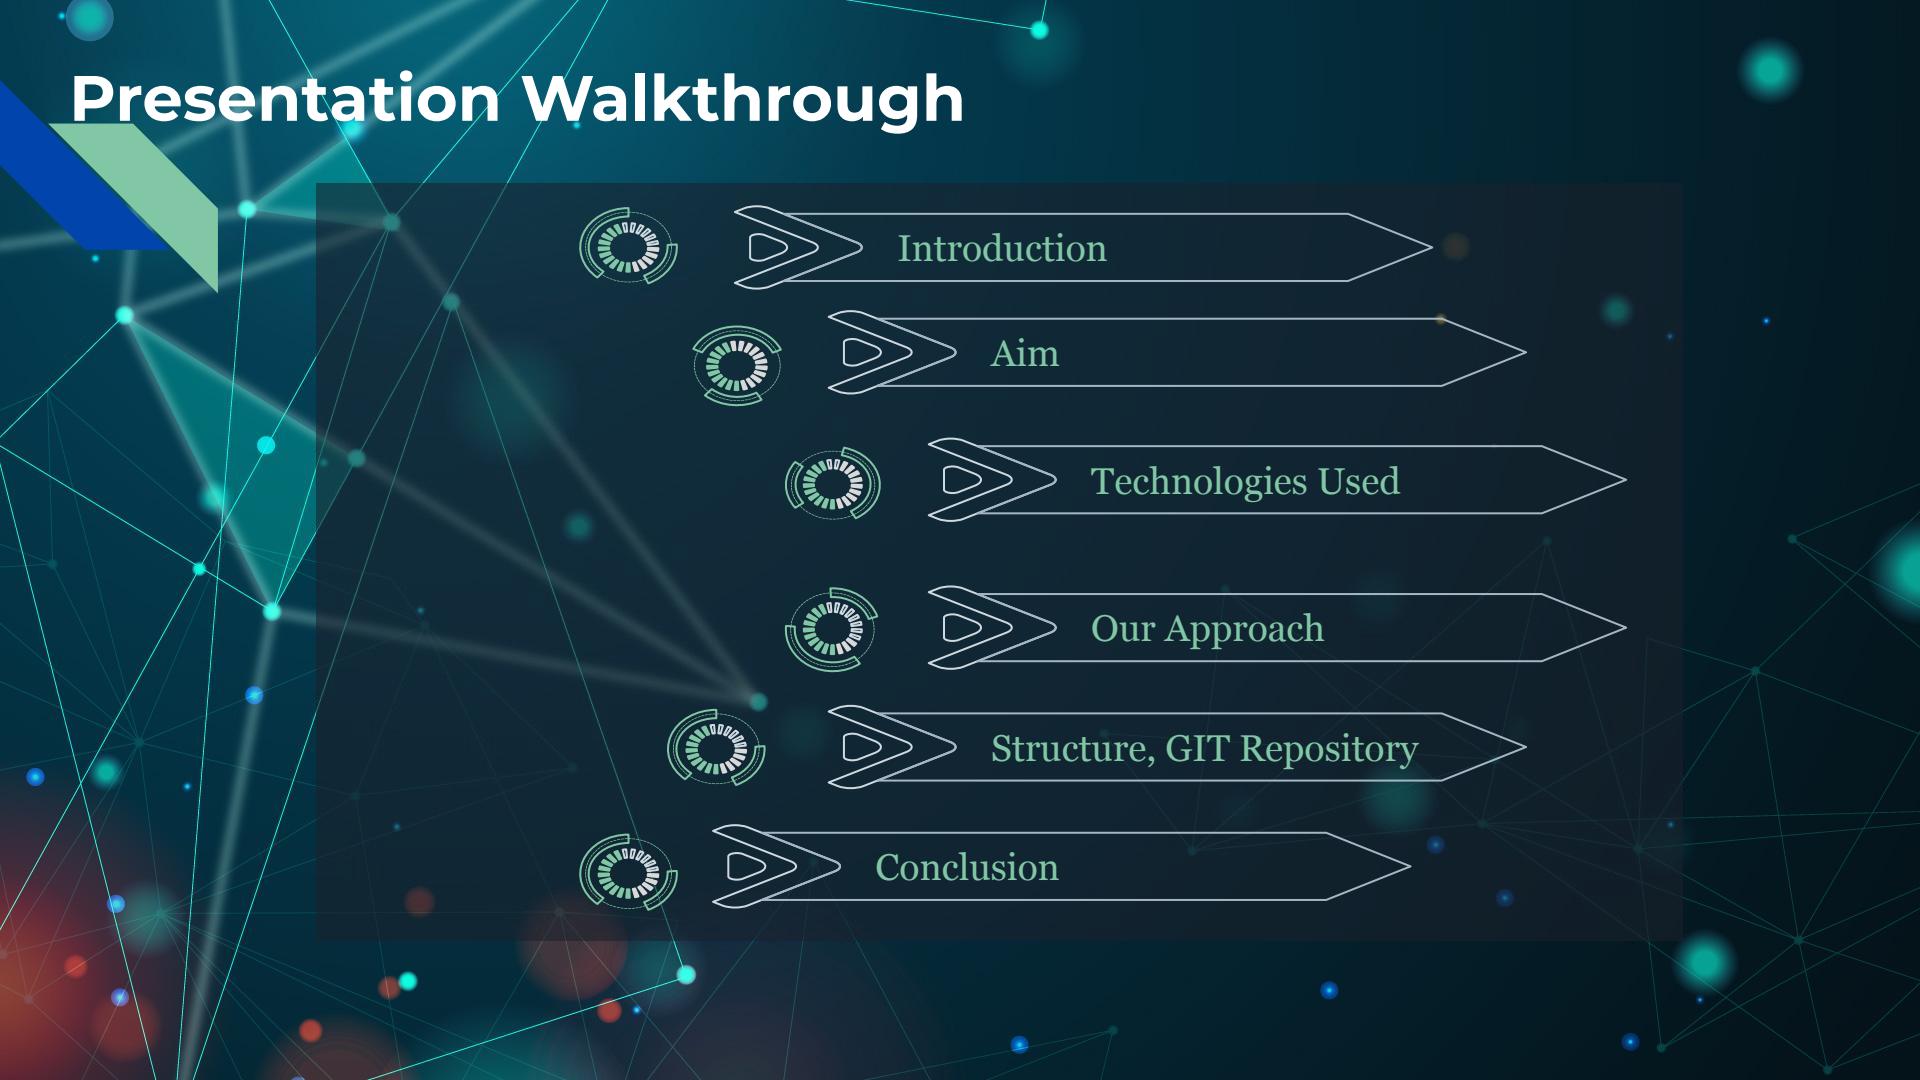

Under the guidance of

Mr. Neeraj Kumar Kheria

Group Members:

- Jeevan Yarlagadda
- Kousalya Gatti
- Jyothirmai Kakani
- Shreya Yashwantrao Jadhav

Presentation Walkthrough

- 
-   Introduction
 -   Aim
 -   Technologies Used
 -   Our Approach
 -   Structure, GIT Repository
 -   Conclusion

Introduction

- ❖ Online shopping is **a process whereby consumers directly buy goods, services etc. from a seller without an intermediary service over the Internet**. Shoppers can visit web stores from the comfort of their house and shop as by sitting in front of the computer.
- ❖ The **COVID-19** pandemic forced everyone to change the way they shop. Whether you were a fan of online shopping or in-store browsing, the pandemic altered routines in many obvious, and some not so obvious, ways.
- ❖ **ShopForHome** is a popular Store in the market for shopping the home décor stuff . Due to Covid 19 all the offline shopping stopped. So, the store wants to move to the cloud platforms and wants their own web application.

Aim

- ❖ This project aims to develop an online shopping for customers with the goal so that it is very easy to shop their loved things virtually without going to any store from their home
- ❖ The objective of the project is to make an application in android platform to purchase items in an existing shop.
- ❖ In order to build such an application complete web support need to be provided. A complete and efficient web application which can provide the online shopping experience is the basic objective of the project. The web application can be implemented in the form of an android application with web view.

Technologies Used

- BACK-END : Spring Boot Framework
- FRONT-END : Angular Framework
- DATABASE : MYSQL WORKBENCH
- DEPLOYMENT : Amazon Web Services

Our Approach

- Angular
- Use of angular framework for client side web application.

- Spring Boot
- Use of spring boot as server side application

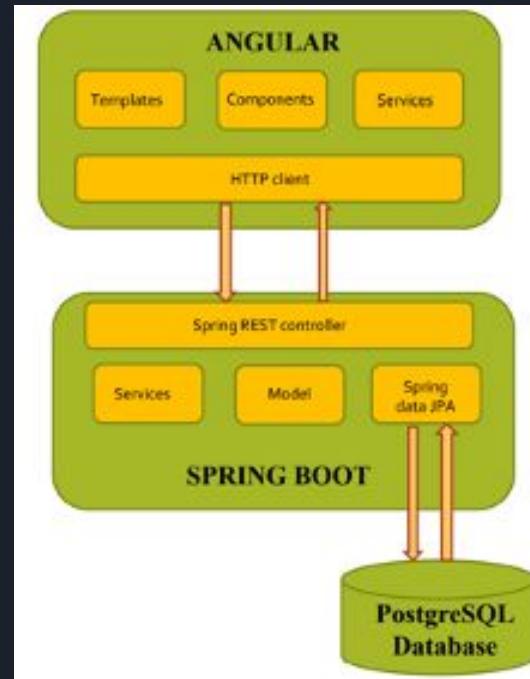

- MySQL Workbench
- Visual database design tool that integrates SQL development

- AWS
- Use Amazon Web Services to deploy the final web application

FRONTEND

User Functionalities

- ❑ As a user I should be able to login, Logout and Register into the application.
- ❑ As a user I should be able to see the products in different categories.
- ❑ As a user I should be able to sort the products.
- ❑ As a user I should be able to add the products into the shopping cart.
- ❑ As a user I should be able to increase or decrease the quantity added in the cart.
- ❑ As a user I should be able to add “n” number of products in the cart.
- ❑ As a user I should be able to get the Wishlist option where I can add those products which I want but don’t want to order now.
- ❑ As a user I should get different discount coupons.

The screenshot shows a web browser window with multiple tabs open, including one for AWS Lab: Program Overview and another for AWS (Hands-On-Lab). The main content is a sign-up page for 'JKJS Store'. The page has a yellow header with contact information and language selection. Below the header is a black navigation bar with links for GROCERIES, PHARMACY, BEAUTY, and TOYS. The main area features a light blue background with a 3D-style illustration of a shop interior. On the left, there's a pink speech bubble icon with a shopping cart symbol. On the right, a yellow sign reads 'ONLINE SHOPPING'. The sign-up form itself is centered, with fields for Email address, Name, Password, Phone, and Address, each with a placeholder text. A large blue 'Sign Up' button is at the bottom of the form.

COUPONS(ADMIN PAGE)

Screenshot of a web browser showing the 'Coupons(Admin Page)' section of a store's admin interface.

The browser tabs include: Shreyajadhavpatil invite, AWS Lab: Program Ove, AWS (Hands-On-Lab), Instances | EC2 Manag, Shop, Meet - qto-nstx-w, and several others.

The address bar shows the URL: localhost:4200/discount.

The page header includes: +919579662059, ₹ ₹ ₹, English, Discount, Users, Stocks, Orders, Admin, and Sign Out.

The main content area features a banner for 'JKJS Store' and a large image of a red and white striped awning.

The 'Coupons' section has a search bar: Search [Enter Some Text To Search].

A text input field: Enter coupon code.

A green button: Add Coupon.

A table with columns: Couponcode and Action.

WISHLIST AND CART OPTION

The screenshot shows a web browser window with multiple tabs open at the top. The active tab is titled "localhost:4200/product/B0001". The main content area displays a "Product Detail" page for a product named "Sugar". On the left, there's a large pink speech bubble icon containing a shopping cart symbol. The central part of the page features a photograph of white granulated sugar in a wooden spoon. Below the image, the product name "Sugar" is displayed, followed by its description as "Quality Sugar", price of "\$5.00", and stock level of "1". A quantity selector box shows the value "1", and the subtotal is listed as "\$5.00". At the bottom of this section are two buttons: a heart icon for "Add to Wishlist" and a blue "Add to Cart" button. To the right of the product details, there's a stylized illustration of a shop interior with a red and white striped awning, a clothing rack with blue shirts, a shelf with folded pink and green items, and a pair of purple sneakers.

SELECTION OF LANGUAGE

A screenshot of a web browser showing a sign-in page for "JKJS Store". The browser has multiple tabs open, including "AWS Lab: Program Ove", "AWS (Hands-On-Lab)", "Instances | EC2 Manager", "Shop", and "Meet - qto-nstx-w". The main page URL is "localhost:4200/login?logout=true".

The top navigation bar includes a phone number "+91 9579662059", currency symbols (€, £, ₹), and a language dropdown set to "English". Other language options shown in the dropdown are French, German, Turkish, and Spanish. The top right features a "Cart" icon, "Sign In", and "Sign Up" buttons.

The main content area displays a "Sign In" form with fields for "Email address" and "Password", a "Remember me" checkbox, and "Sign In" and "Sign Up" buttons. The background of the form features a stylized illustration of a shop interior with a red and white striped awning, clothes on hangers, and a pink speech bubble containing a shopping cart icon. A yellow sign on the right says "ONLINE SHOPPING".

At the bottom left of the page, there is a small footer note: "javascript:void(0);".

ACTIONS ON ORDERS(ADMIN PAGE)

The screenshot shows a web browser window with multiple tabs open at the top. The active tab is titled "localhost:4200/order". The main content area displays the "JKJS Store" interface, specifically the "ORDERS" section. The table lists two orders:

Customer Name	Customer Email	Customer phone	Shipping Address	Total	Order Data	Status	Action
Jeevan	jeevan@gmail.com	1234567890	Jeevan	\$10.00	Aug 5, 2022	New	Show Cancel Finish

DATABASE

DATABASE SCHEMA

BACKEND IN SPRING JDE

The screenshot shows the Eclipse IDE interface with a dark theme. The central part displays the code editor for the file `application.properties`. The code is as follows:

```
spring.datasource.url=jdbc:mysql://localhost:3306/ecommerce?useUnicode=true&useJDBCCompliantTimezoneShift=true&server.timeZone=UTC
server.port=8080
spring.datasource.username=root
spring.datasource.password=kousalyagatti@1708
spring.datasource.driver-class-name=com.mysql.jdbc.Driver
spring.jpa.properties.hibernate.dialect=org.hibernate.dialect.MySQL5Dialect
spring.jpa.hibernate.ddl-auto=create-drop
spring.jpa.hibernate.ddl-auto=update
spring.jpa.show-sql=true
#server.servlet.contextPath=/api
spring.security.user.name=user
spring.security.user.password=password
#Spring Mail Config
spring.mail.host = smtp.gmail.com
spring.mail.port = 587
spring.mail.username = teste@teste.com
spring.mail.password = teste
spring.mail.properties.mail.smtp.auth = true
spring.mail.properties.mail.smtp.starttls.enable = true
#
#spring.queries.roles-query=select email, role from users where email=?
#
#
#spring.datasource.url=jdbc:h2:mem:testdb
#spring.datasource.driverClassName=org.h2.Driver
#spring.datasource.username=sa
#spring.datasource.password=
#spring.jpa.database-platform=org.hibernate.dialect.H2Dialect
29
```

The Project Explorer view on the left shows the project structure for "Walmart-E-commerce-Backend". The code editor has tabs for `application.properties` and `HomeCommerceBackendApplication.java`. The Outline view on the right is empty. The bottom of the screen shows the Eclipse status bar with the date and time.

3

AWS DEPLOYMENT

SECURITY GROUP

The screenshot shows the AWS EC2 Security Groups page. The left sidebar is collapsed, and the main content area displays the 'Security Groups' table. The table has columns: Name, Security group ID, Security group name, VPC ID, Description, and Owner. Two rows are listed: the 'default' security group and the 'Capstone-SG' security group, which is selected and highlighted with a blue border. Below the table, the details for the 'Capstone-SG' security group are shown, including its name, ID, description, VPC ID, owner, inbound rules count (4 Permission entries), and outbound rules count (1 Permission entry).

Name	Security group ID	Security group name	VPC ID	Description	Owner

CREATING LOAD BALANCER

The screenshot shows the AWS Management Console interface for creating an Application Load Balancer. The top navigation bar includes the AWS logo, Services (selected), a search bar, and account information for N. Virginia and jeevan.yarlagadda. The main title is "Create Application Load Balancer". Below it, a descriptive text explains the function of an Application Load Balancer. A section titled "How Application Load Balancers work" is shown. The "Basic configuration" section contains fields for "Load balancer name" (set to "Capson"), "Scheme" (set to "Internet-facing"), and "IP address type". The "IP address type" field has a note about selecting the type of IP addresses used by the subnets.

EC2 > Load balancers > Create Application Load Balancer

Create Application Load Balancer Info

The Application Load Balancer distributes incoming HTTP and HTTPS traffic across multiple targets such as Amazon EC2 instances, microservices, and containers, based on request attributes. When the load balancer receives a connection request, it evaluates the listener rules in priority order to determine which rule to apply, and if applicable, it selects a target from the target group for the rule action.

▶ How Application Load Balancers work

Basic configuration

Load balancer name

Name must be unique within your AWS account and cannot be changed after the load balancer is created.

Capson

A maximum of 32 alphanumeric characters including hyphens are allowed, but the name must not begin or end with a hyphen.

Scheme Info

Scheme cannot be changed after the load balancer is created.

Internet-facing

An internet-facing load balancer routes requests from clients over the internet to targets. Requires a public subnet. [Learn more](#)

Internal

An internal load balancer routes requests from clients to targets using private IP addresses.

IP address type Info

Select the type of IP addresses that your subnets use.

Conclusion

- “Website format is like a store Interior. If the save appears poor or like thousands of different stores the client is most possibly to bypass to the different site”.
- Hence we have designed the challenge to furnish the user with handy navigation, sorting of products and discount options as tons as possible. It is handy for the consumer to view the description of the available product.
- The Shop For Home Application described gives a range of aspects that are designed to make the consumer extra comfortable.
- We have discovered fundamentals of Angular, Web Framework, Devops and Security in AWS & Implemented it in developing an Shop For Home web application.
